ATLAS OF

CANADA'S

NATIONAL HISTORIC SITES

AND NATIONAL PARKS

Introduction

There are national historic sites and national parks in every part of the country. National historic sites commemorate places of significance to the nation. National parks protect some of our most important natural areas.

Each national historic site tells a story of Canada and Canadians - a special place which has helped to shape this nation. There are almost 800 national historic sites in Canada.

Each national park is a place where you can discover and learn about different aspects of the nature and character of Canada. Each of the 38 is unique.

For further information on Canada’s national historic sites and national parks, please contact:
