

TRAIL ETIQUETTE

- In Banff National Park, we share the trail.
- Do not walk or snowshoe on the track set portion of cross country ski trails. The packed smooth middle is for skate skiing and the groomed tracks are for classic skiing.
 - Do not skate-ski on the track set portion of a classic ski trail.
 - When climbing, please yield the right of way to descending skiers.
 - If you fall, move off track as quickly as possible.
 - When taking a break, step to the side, out of tracks.
 - Leave no trace. Pack out everything you pack in.

DOGS

- If you are planning to take your dog out on a trail, please respect the following:
- Dogs must be kept on a leash at all times.
 - Dog are not allowed on the following groomed cross country ski trails: Cascade Valley, Spray River Trail, Goat Creek and Spray River and Redearth Creek.
 - Dogs can add stress to wildlife; the sight of a dog reminds some animals of predators like wolves and coyotes. Prevent your dog from chasing wildlife.

SAFETY CONSIDERATIONS

- Safety is your responsibility. There are always hazards involved with outdoor recreational activities, especially during the winter. Be prepared. Even short trips from the Town of Banff can have serious consequences. Minimize your risk by planning ahead.
- Ask for advice at the Banff Visitor Centre regarding current trail conditions, weather and trail classifications.
- Be sure you have the most current information on trail conditions by checking trail reports online or by visiting the Banff Visitor Centre. The report is updated as conditions change and trails are rated for their overall condition; grooming reports are included for cross country ski trails.
- For a suggested list of appropriate outdoor gear, please visit www.pc.gc.ca/banff.

AVALANCHES

Travel beyond these trails may take you into avalanche terrain. In such cases, make sure you have the appropriate knowledge, skills and rescue equipment.

For avalanche conditions: visit the Banff Visitor Centre or www.pc.gc.ca/banff, and click on the trail conditions report, avalanche bulletin, or visitor information for a downloadable copy of the *Avalanche Terrain Ratings* publication.

WILDLIFE

Winter offers a unique glimpse of wildlife as tracks in the snow reveal the story of their movements. It is a challenge for wildlife to survive a Rocky Mountain winter, but you can help make it easier. If tracks are observed, do not follow them towards the animal.

If you see wildlife, do not approach; give them lots of space and observe from a distance with binoculars or a telephoto lens.

Season

Although snow can fall at any time of year in Banff National Park, optimal skiing, winter walking and snowshoeing opportunities are from late-December to early-April.

Winter Walking and Snowshoeing Trails

The winter walking and snowshoeing trails outlined in this publication follow summer hiking trails. They are not groomed or maintained during the winter season and may be slippery. Weather can change quickly and dramatically in Banff National Park. Be prepared to adjust your activity based on current conditions. As a general rule, if there is fresh snow, conditions may be better suited for snowshoeing; if the snow is old and well-travelled, it may be better for winter walking. If you are looking for trails not listed in this publication, visit the Banff Visitor Centre for additional trip planning assistance.
