

Trails range in difficulty from beginner to advanced.

Leave your vehicle behind
Avoid parking problems. Use our many trails. They connect you to key places to explore close to town. Most connector trails are wide and not too challenging.

Sharing the Trail

Remember to always ride in control since you yield to all other trail users: hikers, horses, wildlife and uphill traffic.

What to do when you encounter other users
Hikers: Greet hikers early and slow down. If the trail is too narrow to pass, stop and move off the trail.
Cyclists: Announce your intention when passing and pass on the left. If being passed on a narrow trail, stop to the side and let the cyclist pass. When travelling downhill, be prepared to yield to uphill traffic.
Horses: Stop at least 10 metres from the horse, get off your bike and create ample room for passing. Communicate with the rider and ask how to pass safely.

Be friendly, adaptable and patient when communicating with other trail users.

Easy Routes

Lakes Loop
 12 14 18 13
Distance: 12 km
Elevation gain/loss: 210 m
Staging from: Townsite
Route • Head out from town on trail 12 and turn left on 14 after crossing Highway 16. Take the bridge across the river and continue on the road to Lac Beauvert where you turn right to continue on the road. Follow that through Jasper Park Lodge until it connects to 18 by the horse stables. After travelling by Lake Annette, take 13 all the way back to town.

Lake Edith Loop
 7g 7 4e 4g
Distance: 6.7 km
Elevation gain/loss: 104 m
Staging from: P2 (Fifth Bridge)
Route • Take trail 7g to cross the Maligne Road and continue south on 7. Turn right on 4e and connect to 4g after arriving at Lake Edith. Keep right and head back following 4g and 7g to complete the loop.

 This flat, wide and non-technical loop is perfect for new mountain bikers and is short enough for families.

Jasper Park Lodge Loop
 12 14 7 4b 7b
Distance: 9.1 km
Elevation gain/loss: 168 m
Staging from: Townsite
Route • Leave town on trail 12 and turn onto 14 after crossing Highway 16. Continue across the river bridge to Old Fort Point and immediately turn left onto 7. Turn right on 4b to connect to Old Lodge Road and follow it back through Jasper Park Lodge (4a). Take either 7b or the Lac Beauvert Road back to Old Fort Point and then follow 14 and 12 back to town.

 Taking you along the Athabasca River and through Jasper Park Lodge, this is a shorter alternative to the Lakes Loop. There is a short stretch of more technical trail in the middle but it is achievable for beginner riders.

Campgrounds Trail
 12
Distance: 6.6 km return
Elevation gain/loss: 131 m
Staging from: Townsite
Route • Follow trail 12 out of town. Choose your own turn around location and consider adding in trails 14a and 14 on the way back.

 An easy ride from town and serves as a great commuter trail to and from Whistlers and Wapiti Campground. Not camping? Whistlers Campground is still a great destination for families to enjoy the playground, food truck or take in an interpretive theatre show.

Moderate Routes

Moberly Homestead
 10
Distance: 16.6 km return
Elevation gain/loss: 375 m
Staging from: P2 (Sixth Bridge)
Route • Cross Sixth Bridge and travel up the gravel road a short distance to access trail 10. Continue to the Moberly Homestead before returning the same way. It is also possible to access this trail from town by taking trails 13 and 7.

 This local favourite features relatively flat single track and the homestead serves as a nice destination. The trail becomes more technical further along if you are looking for a challenge.

Hochimini Loop
 2 15 6e
Distance: 7.2 km
Elevation gain/loss: 236 m
Staging from: P7
Route • Follow trail 2 and then 15 before turning right on Pyramid Beach Road. Turn left onto 6e until it connects to Pyramid Lake Road. Follow the road to Pyramid Lake Resort and then connect onto 2 to finish. If you are riding from town, take trail 15 all the way to the 6e loop.

 Explore aspen groves and lake views on this short loop. Watch out for roots and rocks to navigate along the shoreline.

5th and 6th Bridge Loop
 7 13 4g 7g
Distance: 9.8 km
Elevation gain/loss: 190 m
Staging from: P2 (Fifth Bridge)
Route • After crossing Fifth Bridge, keep left to take trail 7 to Sixth Bridge. Cross the bridge and continue on 7 along the Athabasca River. Cross Maligne Road, turn left onto 13, then take 4g around Lake Edith and 7g back to the start.

 This short loop is a good option for novice riders looking for something more challenging. The rockwalls and river views make this a picturesque ride.

Pyramid Trail
 2 15
Distance: 10.5 km return
Elevation gain/loss: 328 m
Staging from: Townsite
Route • Starting by the Activity Centre (P3), two trails offer different grade options leading up onto the Pyramid Bench: trail 2 is shorter and steeper, whereas trail 15 is more gradual and follows the road initially before turning left to become a trail. Both these options lead to Cottonwood Slough Parking Lot (P4) where you can continue on 15.

 Your muscles will get working uphill but this trail is not technically challenging. Trail 15 ends at Pyramid Lake Resort with excellent views over the lake which serves as a great destination.

Difficult Routes

Overlander
 10 13 7
Distance: 15 km one way
Elevation gain/loss: 593 m
Staging from: P6 (Sixth Bridge)
Route • Follow trail 10 after crossing Sixth Bridge.

 The technical challenges increase along this trail before ending at Highway 16. The treed start leads past the Moberly Homestead before opening up to beautiful views of the valley.

Mina Lake Loop
 11 8a 8 8c 2
Distance: 7.4 km
Elevation gain/loss: 302 m
Staging from: Townsite
Route • Start from the Activity Centre parking lot on trail 11, connecting to 8a followed by 8. Pass Mina Lake before turning right onto 8c. Return to town following 2.

 This trail winds past Mina Lake and features some nice flowing sections with panoramic views along trail 8c. It is a good option for intermediate riders looking for a challenge.

Andretti's to 7h Loop
 7g 7 7h
Distance: 6 km
Elevation gain/loss: 233 m
Staging from: P10 (Fifth Bridge)
Route • Head out on trail 7g and turn left onto 7 after crossing Maligne Road. Stay on 7 crossing back over the Maligne Road at Maligne Canyon and then follow 7h back to the parking lot.

 Start off with steady uphill before enjoying some exciting downhill on the ridge above Maligne Canyon.

Marjorie Lake to Ganges Loop
 11 3 3i
Distance: 8.4 km
Elevation gain/loss: 377 m
Staging from: Townsite
Route • Leave town at P2 trailhead on trail 11 and immediately connect onto 3. Take a sharp left onto 3i to explore some more technical terrain. Follow 3 and 11 back into town.

 Come past the tranquil Marjorie Lake before taking on the challenging Ganges trail with spectacular views of the mountain ranges south of town.

Looking to rent a bike?

There are many local businesses that rent bikes of all kinds: mountain bikes, e-bikes, fat bikes, etc. Check our website for a list of rental places:
parks.canada.ca/jasper-biking

Jasper has a bike park!
 Jasper Park Cycling Association completed the first phase of the new bike park. The jump line and drop zone are located right in town along Connaught Drive and are free to use.
 Check out their website for more information:
jasperparkcycling.com

E-Bikes
 (Pedal assist electric bikes)
What does pedal assist mean?
 Power assistance is only provided when the bike is being pedalled. When pedalling stops, the power assistance also stops. Authorized e-bikes also need to:

1. generate 500W or less;
2. stop power assistance when travelling 32km/h.

A bike that has an accelerator (a throttle) is not a pedal assist e-bike; it may only be ridden on roads, not on trails.

Trail Signage

3
 Official trails around the town of Jasper are marked with yellow diamonds or Wildland Trail signs. This large trail system is maintained by Parks Canada staff and Friends of Jasper National Park volunteers.
 Remember, if a trail is not signed, you're not allowed to ride on it.

Trail conditions and maintenance

Check general trail conditions here:
parks.canada.ca/jaspertrails

When not to ride your bike
 Avoid riding when conditions are wet and trails are soft. Using a bike on soft soil damages the trails. It creates lumps, dips and ruts. Once dry or settled, the trail is no longer fun to use. Trail damage takes a very long time to repair.
Be a responsible biker. Wait until a trail is dry before riding it.

Trail maintenance
 Trail crews clear the trails each spring but high winds make trees fall all year long. If your ride involved carrying your bike more than riding it, report the problem to:
jasperinfo@pc.gc.ca

Want to be part of a team and become an avid trail keeper? Look into certified volunteer opportunities. Contact the Friends of Jasper National Park for more information on volunteer programs: volunteers@friendsofjasper.com

Be prepared and stay safe

- Before you head out, make sure you are prepared:**
- Stay informed. Check the trail conditions report and the weather forecast.
 - Pack adequate water, food, gear, maps and first aid. Remember to pack out all garbage.
 - Carry bear spray and know how to use it.
 - Tell someone where you are going and when you are expected back.
 - It is safer to travel with others. Choose a trail suitable for the least experienced member in your group.
 - Ensure that you know your equipment and it is advisable to wear a helmet.

You are in bear country
 Cyclists are particularly susceptible to sudden, dangerous bear encounters because of the speed and silence of their travel. Slow down, stay alert and scan ahead. Yell and let bears know you are coming, especially when biking through dense vegetation, near streams, on windy days, or when approaching corners. Bear bells are not enough and bear spray should be accessible at all times.

Emergency
Call 911 or if using a satellite phone, call Jasper Dispatch (780-852-6155). Keep in mind that cell phone reception is unreliable.

 Fat Bike Trail

Are you keen to bike year-round?

Most trails are suitable to fat bike during the winter months. The favourite trails are marked on the legend above.

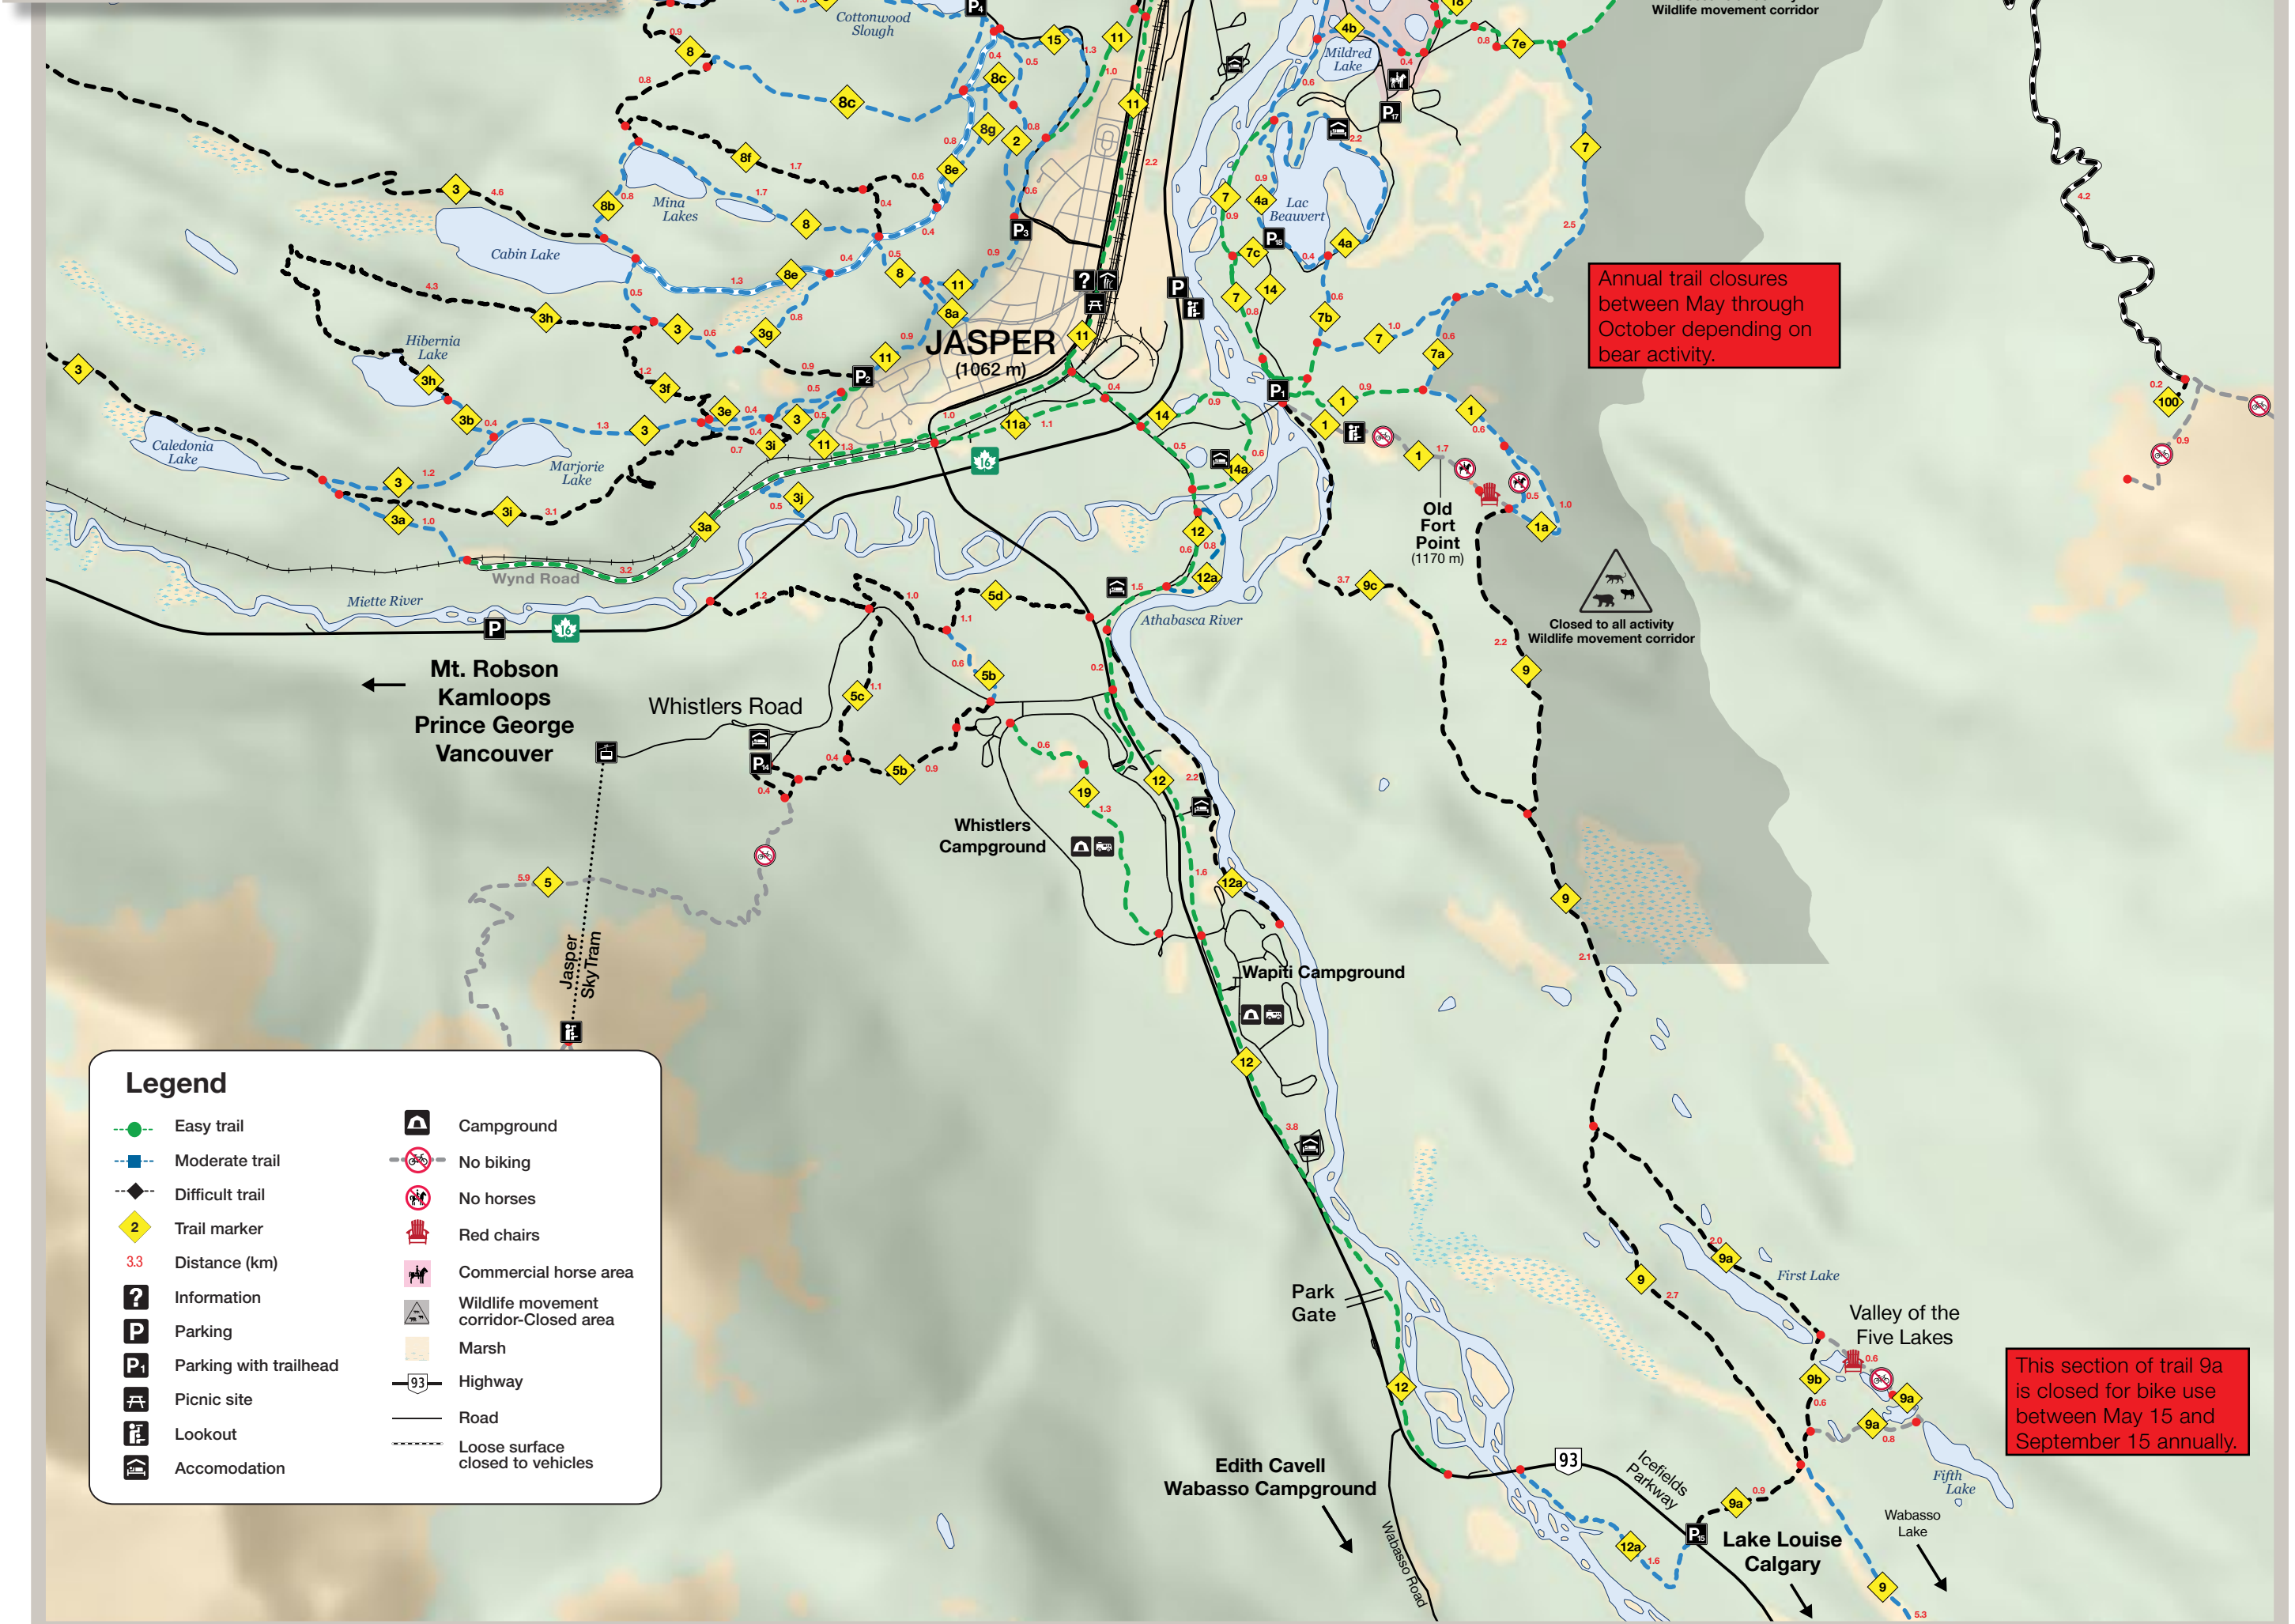

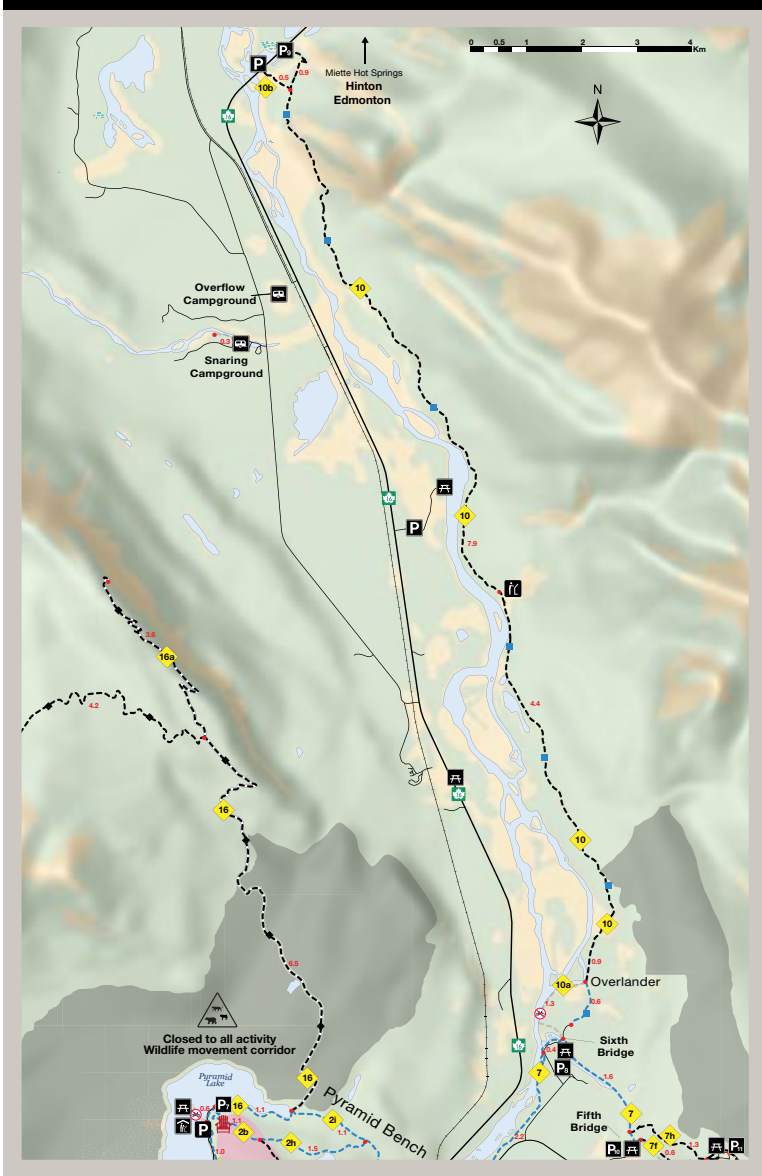

The Friends of Jasper National Park has a volunteer program to flat pack many multi-use trails near the town of Jasper. Check out their website: friendsofjasper.com

In addition to trails, it is also possible to explore the frozen lakes by bike. Pyramid and Maligne Lakes are local favourites. **Caution! Make sure the ice is safe before heading out. Safety is your responsibility.**

Overlander and Pyramid

Annual trail closures between May through October depending on bear activity.

This section of trail 9a is closed for bike use between May 15 and September 15 annually.
