PRINTED IN CANADA. 2/28
OF all the national playgrounds in the world—and they are many—Jasper National Park, Alberta, in the heart of Canada’s Rocky Mountains, is the largest. The area within its boundaries, enlarged during 1927, exceeds 5,000 square miles and in it are to be found, with the exception of geysers, all and more than any other national playground in North America has to offer.

Because of its tremendous size, its location in an area of great beauty, the development which has occurred within that portion closest to the lines of the Canadian National Railways, and its comparative detachment from the outer world—there are no motor roads leading into or out of the park—Jasper is able to meet adequately those requirements which holiday seekers are demanding of the territories recommended to them. In all truthfulness, here it may be said is a great range of country unspoiled by man; mountains, rivers, lakes and forests untouched, existing as they were created. What alterations man has wrought are simple and few, not interfering with the natural beauty of the park and designed solely that visitors may see, appreciate and enjoy it to the full in the limited time the average holiday permits.

There is only one centre of population within the park. This is the Town of Jasper where the traveller detrains. It has about 1,000 inhabitants, most of whom are engaged in railroad work, this being a divisional headquarters, or in the administration of park affairs, the headquarters of the park being located here. There is also a mounted police barracks where a detachment of the famous “Crimson Riders” of the Canadian Northwest is stationed.
Three miles from the station, and connected to it by a paved motor road, is Jasper Park Lodge, a summer hotel of the Canadian National Railways. Words are almost futile to describe this picturesque summer resort whose beauty and hospitality have in less than five years attained such a degree of popularity that from an unpretentious beginning it has been necessary to increase the size of the hotel to accommodate more than five hundred people. Additional accommodation is planned.

In general, the hotel consists of a number of bungalows radiating from a central lodge in which are located the various public rooms as well as a limited number of bed rooms. These bungalows vary in size. Some accommodate a family of four, some have sixteen rooms. Every bed room is equipped with hot and cold running water, electric light and telephone. A majority of the rooms also have private baths attached. The bungalows have a sitting and writing room and a verandah. Each faces towards Lac Beauvert, a beautiful mountain lake upon the shore of which the hotel rests.
The main lodge, the largest log building in the world, contains the lounge, the ball room, the dining room, the office and other public rooms of the hotel. The lounge is spacious, tastefully decorated and in the centre of it is a two-faced stone fireplace where full-length logs are burned. The ball room where three hundred people can dance comfortably joins the lounge as does the dining room which has accommodation for more than four hundred people at a sitting.

Into the construction of the main building and the bungalows has been brought to bear all the ingenuity of skilled architects and engineers. The walls have been built of logs and stone gathered from the mountain sides, the wood stained a natural brown, the stones a natural glistening white. The roofs of all the buildings are green so that the whole effect is one of harmony with the natural peace and beauty of the surroundings. Gnarled and warped woods have been cleverly used for decorative effect in the building of the interior of the main lodge and the verandah supports of the bungalows and this feature is one of general delight and admiration. The floors are all hard-wood and the whole atmosphere one of quiet luxury.

Mount Edith Cavell (altitude 11,033 feet) — The Queen of the Rockies.

IN THE HEART OF THE CANADIAN ROCKIES
Another glimpse of Lac Beauvert.

On all sides of Jasper Park Lodge great mountains bulk against the sky. Behind it rises the Colin Range, grey, gaunt and knife-like at the crest. To the right, in contrast, Pyramid Mountain stands on guard above the Athabaska Valley, a bulwark of color whose reds and browns challenge those of the sunset. Further to the right, the friendly Whistlers, tree-covered almost to the top, fling themselves across one whole side of the valley to end beside Mount Edith Cavell, the Queen of the Rockies. This majestic peak, crowned with silver snow year in, year out, rises in regal splendor more than 11,000 feet above the sea, commanding the valley from end to end. To the breast of this mountain there clings a great glacier, the Glacier of the Angels, so called because to the eye it looks like the outspread wing of an angel hovering in mid-air between the crest and the base. To the left loom Kerkeslin, snow-capped and terraced like the mountain in a Japanese print; Tekarra with its fortress-like abutment and Signal, from whose heights in days gone by, the lonely traders signalled the advance of voyageurs up the valley on their way from the sea.
Immediately in front of the Lodge lies Lac Beauvert, whose waters on a cloudy day change color as an opal, and, when the air is still and clear, provide a perfect mirror wherein is reflected all the grandeur of the encircling hills.

The facilities for enjoying oneself at Jasper are many and varied. In the rear of the main lodge are situated championship tennis courts. Directly in front, on the lake shore, is an open-air heated swimming pool with a wading end for children. A qualified instructor in diving and swimming is always on duty. Boating and canoeing may be enjoyed on the lake, and exercise made doubly attractive as one has an opportunity to study the habits of the beaver that have built their lodges on the shore.

Within one hundred yards of the main lodge is located the club house and first tee of the famous Jasper Park Lodge Golf Course, acclaimed by experts as the most perfect golf course in the world. There are 18 holes, a shot for every club in the bag and a natural setting that is incomparable.
From the Lodge splendid motor roads radiate to various points of interest in the heart of the park. One of these spirals from the floor of the Athabaska Valley to the foot of the Glacier of the Angels on Mount Edith Cavell. A second swings through Jasper Town to Patricia and Pyramid Lakes, two emerald tarns nestling at the foot of Pyramid Mountain. A third winds upward to Maligne Canyon, a great gash in the surface of the earth into which the Maligne River tumbles headlong to lose itself. This road continues along the base of the Colin Range to Medicine Lake and eventually will be extended to Maligne Lake, the largest glacial-fed lake in the Rockies and one of the most wonderful spots this side of Paradise. A fourth follows the swirling Athabaska River through the valley to Pocohontas. This last is a splendid drive for the camerist as along the way deer, bear and mountain sheep are to be seen close enough to be photographed. Altogether these motor roads total about one hundred miles.
For those who are interested in mountain climbing, expert Swiss guides are available at the Lodge. There are short and easy climbs; long and hard climbs, both without number and to the natural zest of this “Sport” (quoted with malice aforethought) there is the added allurement of making a first climb as there are hundreds of unclimbed and unnamed peaks in the park.

Trail riding is another popular pastime. Nor is it as hard as it sounds. The horses have been selected for their ability to tread the mountain trails, ford streams, pick their path around boulders and over deadfalls and not for their speed or their good looks.

The trails are delightful. They run their wanton way hither and thither, now in the valley beside the streams and lakes; now through the sweet scented woods; now on the wind-swept uplands where the most gorgeous fields of flowers bloom at the very foot of the snows. But wherever they go, high or low, they are by-ways of unending charm of never-failing delight. To tell the story of all of them would be to attempt the
impossible. It is sufficient to say that the trail ride can be two hours or two months, but that along the way there will always be something new to see, something of the real values of life to enjoy.

That does not describe Jasper, for the story of Jasper is one that neither the pen nor the brush can tell. It is a story for the hearts of those who love the world as Nature made it and remain content to let that story rest in the pages of memory.

FOUR-DAY SADDLE AND CAMPING TRIPS

SADDLE TRIP No. 16: Maligne Chalet, commanding a full view of Maligne Lake, is situated on a low plateau at the outlet. Before the Chalet and extending in a southeasterly direction for seventeen miles, with a breadth varying from two hundred yards to two miles and possessing some fifty miles of shore line, lies the largest glacial fed lake in the Canadian Rockies.

Beginning with Mount Samson, the jagged peak ten thousand feet high facing the Chalet on the left, the altitude of the peaks forming the Maligne group, which includes Mounts Charlton, Unwin, Warren, Mary Vaux and Maligne, increases until, in Mount Brazeau, a height
of twelve thousand two hundred and fifty feet is reached — one thousand feet higher than Mount Edith Cavell and approaching the height of Mount Robson itself.

The mountains rise precipitously from the lake and are heavily laden with snow and ice. At the southwest end of the lake, farthest from the Chalet, lies a considerable snowfield and leading in a southerly direction towards the Brazeau River district is a high, though broad snowpass, along the western base of Mount Brazeau and affording an easy way of access to this very interesting neighborhood. The nature of mountains in the Maligne Lake district, affords abundant opportunity for both ice and rock climbing and is within easy reach of the Chalet by motorboat, horseback or on foot and many comparatively easy climbs may be carried out by the amateur.

The mountains, meadow and flowers of the alplands lying to the west within easy reach from the Chalet, will prove of interest to botanist and naturalist alike. Sheep, goat, cariboo, moose and deer frequent these
One of the great charms of the Park is the pastures. The Opal Hills facing the Chalet on the east, provide sheep and goat for the observation of the visitor, while the mountain sides overlooking the lake and particularly those about the southeast are used extensively by the mountain goat as a summer pasture.

The first five miles of the trail lies eastward from Jasper Park Lodge down the Athabaska Valley to the Maligne River, then turning up the Maligne River, along the base of the Colin Range nine miles to Medicine Lake and three and one half miles along the shore of Medicine Lake to Medicine Lake Lodge. From Medicine Lodge stretches ten miles of good trail and easy grades along the east bank of the Maligne River to Maligne Chalet.

Visitors returning by the Shovel Pass route over the Maligne Range, on leaving the Maligne Chalet, proceed up the slope of the mountains to the west of the Chalet and crossing the Alpine meadows, go through
abundance and fearlessness of its wild life.

Little Shovel Pass and big Shovel Pass to spend the night at Shovel Pass Camp, completing the trip the following day by following the trail down from the Maligne Range, by Signal Mountain, into the Athabaska Valley and return to the Lodge.
