

Help us protect this habitat

- Keep an eye out! On this island, in the **barrens**, there are several species of **arctic alpine plants**, a rarity for this latitude and altitude.
- To protect the delicate plants, use the **designated trail** and stay on the **vegetation-free zone** when walking on the seashore.
- Avoid disturbing wildlife and be sure to leave natural objects such as rocks, plants, and fossils where you found them.
- **Be attentive** and **keep your distance** from seabirds and shorebirds. They are particularly vulnerable to disturbance, especially during nesting and migration seasons.

Did you know that

- The island used to be called **Walrus Island**, the English for *Île au Morse*, after the tusked marine mammals that lived there.
- When the lighthouse was built in **1915**, the island became a navigation landmark. Today, you can see the second lighthouse and its outbuildings.
- Rosaire Boudreau, who worked there until **1987**, was the last lighthouse keeper. Now a skeleton tower has taken over the job.
- The locals' lives were ruled by the seasons: they grew gardens, raised grazing animals, harvested hay, gathered eggs and picked berries - much to the delight of the children!

Want to know more?

You'll find **interpretive panels** in the area around the lighthouse station.

Area closed during the nesting period

Area known to be inaccessible at high tide

For your safety

Falling rocks are a hazard near the cliffs, refrain from stopping or from walking underneath overhanging rocks.

At low tide, water and seaweed on the rocks create slippery conditions. Please proceed with caution.

Climbing on the monoliths is dangerous and prohibited.

Limited cell phone access. Plan an adequate communication device.

Perimeter: 4.2 km
