

Trip Planning:

- ❑ Make a trip plan, let someone know where you are going, how long you will be and who to contact in the event you fail to return.
- ❑ Plan your outing according to the weather conditions and daily forecasts. Ensure that you have plenty of water, sun protection and rain gear. Weather on Lake Superior can often change without warning. Hattie Cove is a sheltered area from the main coast but it's important to remember that it is still a part of the lake and can be subject to rough waters.
- ❑ Rental canoes/SUPs may not be used before sunrise or after sunset. Full daylight is required for safety and to view the great landscape!

Training:

- ❑ Know your limits, you are responsible for your own safety. Due to Pukaskwa National Park's remote location, emergency response can be delayed.
- ❑ Ensure your group is knowledgeable and have the physical fitness required for the activity.

Taking Essentials:

- ❑ Life jackets should be worn at all times while operating canoes/SUPs. It is the responsibility of the participants to ensure that their life jackets fit properly.
- ❑ The canoe capacity is 900 lb. Do not exceed this weight limit. Only one person is permitted on each SUP.
- ❑ Each canoe is equipped with a bailer, flashlight, whistle, and 15m buoyant rope. Each SUP is equipped with a whistle, flashlight and safety tether

For your safety:

- ❑ Rental canoes/SUPs are not equipped to handle the challenges of Lake Superior; they may not leave the shelter of Hattie Cove. Stay clear of the Lake Superior access point which is across from the canoe launch area.
- ❑ Remember, the water in Hattie Cove, although beautiful and clear, is very cold. Should you capsize, make your way to shore as fast as possible or stay on top of the vessel and signal for help. Hypothermia can occur quickly in Lake Superior's year-round average temperature of 4°C.
- ❑ In the event of an emergency call the duty officer at 1-807-229-0801 ext. 237 or Jasper Dispatch at 1-877-852-3100.
